

DIEMME FILTRATION

Industrial Sectors

Beneficiation of metals (iron, nickel, copper, zinc)
Beneficiation of non-metals
Beneficiation of noble metals (gold, silver, platinum, palladium)
Coal processing
Calcium carbonate
Minerals in general (silicates, clays, kaolins, etc..)

QUARRIES

Aggregates for construction (sands, gravel)
Aggregates from marble and granite processing

METALLURGICAL

Hydrometallurgy
Metals refining (vanadium, chromium, manganese)
Noble and rare metals refining (gold, silver, palladium, platinum)
Steel plant and foundry (fumes treatment)

MUNICIPALITY

Drinking water plants
Waste water treatment
Incinerating plants
Treatment percolates of Urban Solid Wastes

CHEMICAL / PHARMACEUTICAL

Chemical:
Fine chemistry
Basic chemistry
Fertilizers
Synthetic fibres
Special and technical gas
Pigments and dyes
Plastic materials and synthetic resins
Varnish, ink and adhesives
Perfumes, cosmetics, soaps and fats and oils
Petrochemical
Cements and hydraulic binders
Treatment of surfaces
Lead recovery from batteries

Pharmaceutical:
Vaccines
Antibiotics
Blood derivatives
Pectins

ALIMENTARY

Agricultural and food
Dairy-industry
Distillation
Slaughter-house
Sugar industry
Growing industry
Oil-mill
Brewery

CERAMIC GLASS AND CRYSTAL

Production of tiles
Production of enamelled sandstone
Production of ceramic mixings (Barbotines)
Glass and crystal
